Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 14 April 2004.
- 2a) This action is **FINAL**. 2b) This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 7-8, and 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kientz et al. (US Patent Des. 426,121). Kientz et al. discloses a tool for twisting rebar wires having a receiver including a round base and a hooked tip and a shaft member having an end for receiving the chuck of a machine, see Figure 1.

3. Claims 1-4, 7, 10-13, and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayakawa (US Patent 5,339,869). Hayakawa discloses stranded wire (cable) binder having a hexagonally shaped shaft member (Figure 10) and a receiver including a hook (13). The particular material of the binding member is not given patentable weight. A standard drill having multiple user torsional settings provides the rotational force (torque limiter 31, clutch 32, and Figure 1). With regards to claims 17-19, the apparatus is capable of performing the claimed method; also see Figures 14 and 15.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kientz et al. Kientz et al. discloses the invention substantially as claimed except for the particular dimensions of the receiver. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to have the particular claimed dimensions of the receiver since it has been held that discovering an optimum or workable ranges involves only routine skill in the art.

6. Claims 5 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kientz et al. in view of Fenlason (US Patent 1,181,297). Kientz et al. discloses the invention substantially as claimed except for a hollow sleeve through which the shaft member extends. Fenlason disclose a wire twisting tool having a shaft 1 through sleeve 9, see Figures 1 and 2. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to use Fenlason's sleeve with Kientz et al.'s invention in order to greatly facilitate the manipulation of the tool by the operator, Column 2, lines 33-37.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and further shows the state of the art: US Patents 4,798,231 and 3,970,117.
